## Comments

- 1) We need two party's, with different goals. One disco, and one lounge area.
- 2) In the whole: “ great organization, one of the best!”
- 3) I found the weekend a bit over-organized. Too much program. There were so many games that the party only lasted 1-1,5 hours. What a shame!
- 4) Workshops in English ok, the lecture on Sunday was too difficult to follow. To fast, too much “written English” . Better to give hand-outs or more relating seminar on a topic, moderated by one of you.
- 5) Doing the whole thing in English made a better group feeling. Also staying in the school on Friday evening was a great choice!

## Conclusions

From the evaluation I conclude the following:

The organization did very well In Leuven. Their overall score is 4.2 out of 5, so they are in a very high score. In the different area's you can see where the score are high or low.

The lowest score is the travel directions. My guess is that the organization made a beautiful webiste, but not everyone has been able to get onto it. There were directions on that site, but nowhere else. Offcourse this is also something people have to prepare themselves if they come, and maybe they came unprepared.

The highest score is the residences. Everybody felt welcome there. So a big thank you for all the student from Leuven who opened their doors for the students.

In the language question, everybody agreed on having the weekend in English. Some voted twice on different languages. I found one comment interesting about this matter, that is that there was a bigger group feeling in Leuven, because of the language. I agree that there was a better group feeling, and that the language had a role in this part.

About the group feeling: I think the Leuven organizers have great spirits and have the ability to make a group feeling among all the students. They have worked really hard and long hours to organize the weekend, and from everybody in the EAMTS we want to thank you!
